New Mood Design transformed a 300-square-foot interior space on two levels into a powder room for guests and a master bathroom suite off the master bedroom. After the space in this Vinings home was gutted, new connections between existing rooms were added with a revised flow for new functions. New Mood Design created a bright, expansive space with a minimal, light-colored palette featuring floor-to-ceiling glossy white wall tile. African mahogany millwork, a soft walnut floating vanity cabinet and gray-brown floor tiles add warmth and richness. Contractors included A Custom View, LLC, and Artisan Custom Closets.
